EconPapers

Consequently, precise data on the numbers and causes of foodborne illness do not exist.

EconPapers

It had seemed to make sense: The big products delivered better gross margins than pens and paper. FDA is not changing the warning label statement requirements in this rulemaking. FDA has recently issued guidance describing 50 parts per billion ppb as a recommended level for patulin Refs.

EconPapers

This may be due to having a low income or having to travel farther to find healthful food options. They say cost-cutting takes time; merging corporate cultures successfully takes time.

EconPapers

Impacts This project has now ended. Comparison of the Proposal and this Final Regulation III. Therefore, FDA is declining to mandate pasteurization for juice.

EconPapers

The comment asserted that § 120. This granted, it still seems that in a significant fraction of metropolitan markets, any sizeable horizontal merger will likely be challenged, especially given the recent history of challenges in this industry. Comment 25 Several comments maintained that the risk

from juice is low and does not warrant a HACCP regulation.

### **Ownership Incentives, Product Choice and Market Structure in the Food Industry**

In fact, because the amount of peel oil in juice will vary from process to process, the agency disagrees that the antimicrobial effects of citrus peel oil can adequately control pathogens in juice.

### **COVID**

However, such review may alert the processor to a problem that, if resolved, would prevent recurrence of the problem with other consumers. The defendants argued that, in fact, costs were higher in one-firm OSS markets.

### **Food deserts: Definition, effects, and solutions**

FDA intends to publish a juice HACCP hazards and controls guidance to assist processors in this step of the hazard analysis.
