Climate Change Exacerbates Existing Conflict Risks, Likely to Create New Ones, Assistant Secretary

Its security implications are best addressed through massively scaled-up, accessible climate-adaptation and mitigation-related support to affected countries. It is observed that sea level is increasing because of global warming.

Climate change

Sea level: Around 70% of surface of the earth is full of water in the form of sea and ocean.

COP26

Stressing that climate change is a development issue — rather than a matter of security — he said addressing it must be a priority. Climate Change and its impacts on water supply and demand in Sydney online.

COP26

He made several recommendations, asking the United Nations to conduct an integrated climate security assessment before engaging in country assistance. This position was then introduced to governments at the ICAO High Level Meeting on Climate Change in 2009 and the United Nations Framework Convention on Climate Change UNFCCC climate talks in Copenhagen that year, as well as at the 2010 ICAO Assembly where they formed the centrepiece of discussions.

Climate Change Assignment Sample

Outlining several opportunities for action, he said new technologies must be leveraged to translate long-term climate foresight into near-term action. Agreeing with other speakers that robust analysis must inform all the United Nations work, he also echoed calls for the Secretary-General to appoint a Special Representative on Climate and Security and provide contextual reporting, and for the Council to enhance the inclusion of climate-related security risks into its peacekeeping mandates. Although he has acknowledged some timings were wrong, its fundamental message

that population growth and high levels of consumption by wealthy nations is driving destruction.

Climate Change Exacerbates Existing Conflict Risks, Likely to Create New Ones, Assistant Secretary

He also advocated for tailored, evidence-based approaches to climate security threats, which means including climate risk assessments, climate forecasting and resilience as integral parts of the Council's work. Calling on the international community to halt and reverse climate change, she added that the Council — as the premier organ responsible for peace and security — should take the time to understand the threat and do everything possible to address it. Wind: High winds in Sydney region are linked with various climate systems like ex-tropical cyclone, thunderstorms and frontal system.
