## Two decades after apartheid ended, racial tensions rattling South Africa

Reconstruction remains relevant today because the issues central to it -- the role of the federal government in protecting citizens' rights, and the possibility of economic and racial justice -- are still unresolved. A large part of the people of the North were undoubtedly inspired by a missionary spirit which had a high motive beneath it.

## The Great Migration

This systematic racial segregation and oppression was enforced through an extensive security and police force that routinely employed violence against black South Africans. When some African American men exercised rights of political citizenship, it appeared to white conservatives as an overturning of a divinely ordered hierarchy. Even this interaction of religion and public life appears likely to change, however, as for example Hispanic Catholics and Pentecostals make their voices heard, and highly educated Asians in the university and medical communities grow more assertive in public expression of their Hindu, Buddhist, Catholic, Sikh, or other faiths.

Targets for housing construction have not been met and long backlogs have grown from an estimated 1. As late as the 1980s, black babies in urban areas died at six times the rate of white babies.

This feeling may hardly be explained to those who had not known it. During the mid-20th century, religious segregationists peopled the white churches of the region, but they were difficult to organize into concerted action. The failure of a servile population to rise against their masters in time of war is no new thing.

### **Land, Labour and Apartheid**

This self-complacent ignorance is one of the factors which prevent a complete understanding of the problem and tend to perpetuate the errors which have cost so much in the past and, unless corrected, may prove yet more expensive in the future. Indeed, the very term southern identity itself has been called into question.
