Creating New Pasts: Reality, Facticity and Interpretation in Peirce and Heidegger

The generated knowledge is based on probability rather than on the construction of causalities. New York: Columbia University Press, 1995.

Time and Matter: Historicity, Facticity and the Question of Phenomenological Realism

Both, the process of arriving at categories and the multiple decisions about what becomes visible or invisible, what to select and what to exclude within the system become black-boxed and disappear in the created image. Le sombre abîme du temps.

An existentialist approach to authentic science

Multiple Profiling machines : Proto-paranoiac Subjectification and Hyper-facticity Today, profiles and profiling are used in many different contexts: customer profiling, profiling for employment screening, credit scoring, criminal investigations, immigration policy, healthcare management, forensic biometrics, etc.

An existentialist approach to authentic science

Experience and history: Phenomenological perspectives on the historical world. Post-Licensure Vaccine Safety Monitoring After a vaccine is approved and in widespread use, it is critically important to continue to monitor vaccine safety.

Algorithmic Decision

Increasingly, psychometrical categories are used to create clusters of consumer types profiles and to predict consumer behavior. She has published widely in the fields of literary and cultural theory, semiotics, American pragmatism, epistemology, and on a broad range of topics in American literature of the 19th and 20th centuries.

Algorithmic Decision

In the final section, the paper discusses emerging forms of governance and the modes of subjectification associated with the current condition of multiple profiling machines. As the order of dependency implies, reality, for instance, as a product of sign processes and thus representing Thirdness by necessity incorporates elements of pure quality and reveals an aesthetic dimension.

The research process (1999 edition)

Unconconcealment belongs primordially to Dasein , as Dasein unfolds in events of uncovering, that is, in moments where the meaning of a phenomenon is uncovered for the individual and by the individual. In this paper, we argue that the existentialist philosophy concept of authenticity would be useful for scientists to prevent issues of reproducibility, data manipulation, fraud, and mentorship.
