China Foreign Direct Investment

Businesses are successful because humans have expertise. Its regional presence has grown markedly over the last quarter-century, so much so that it is influencing regional institutions and economic structure.

Foreign Direct Investment (FDI) and the Economy of China

Singapore lost its top position and was ranked 18th, although Hong Kong SAR was one economy that recorded improvement during the second period by improving its ranking to 2nd.

Invest in China

Public sector savings declined in quantity and importance and household saving soared with rising household incomes, and soon grew to half of total savings in the economy. Its rapid trade expansion will materially affect its developing and industrial country partners, and analysts concur that its WTO membership and trade expansion has favorable welfare implications for both China and the global economy.

Analysis of Motives and Prospects within the OLI framework: a Case Study of German FDI in China

IMPLICATIONS FOR AMERICAN BUSINESSES The era of rising Chinese investment will be both sweet and sour for American businesses. As the recipient company benefits from the investment, it can pay higher taxes. In this paper we apply the OLI framework to understand the motives behind German FDI in China.
