Catalog Record: The complete dictionary of arts and sciences....

Salivary glands, of which the most constant are the parotid and the submaxillary, are always present in terrestrial mammals. Machteld Swanborn and Kees de Glopper estimate that of one hundred unfamiliar words met in reading, between three and eight will be learned.

Ecology

Change as cyclical in form, consisting in movements between equilibrium stages, is clearly the most intelligible conception.

Literacy

Complex habitats with a high index of biodiversity generally are more ecologically stable and resistant to disturbances.
